### **DETAILED ACTION**

1. Applicant's amendment and accompanying remarks filed October 25, 2007 are acknowledged.
2. The rejection of claims 1, 3-7, 9-12, 25 and 27-29 under 35 U.S.C. 103(a) as being unpatentable over Aziz et al., U.S. Patent Number 6,773,830 is withdrawn due to applicant's argument.
3. Examiner regrets the premature indication of allowability in claims 30, 114, 118-121 and 125-142.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1, 3-7, 9-12, 25, 27-30, 114, 118-21 and 125-142 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 7,342,355. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in both the present application and the patented reference recite a light emitting device comprising an anode; a hole transporting region; a mixed region; an electron transporting region and a cathode. Additionally, the claims of both the present application and the patented reference recite that the concentration of the first compound in the hole transporting region increases towards the cathode and the second compound of the hole transporting region declines toward the cathode. The claims of both the present application and the patented reference recite that the mixed region comprises a luminescent material that emits light in the triplet state.

***Response to Arguments***
